

G.AutoReel

Compact Fall Arrester

GSE1050

The G.AutoReel fall arrester is a compact and safe alternative to using a shock absorbing lanyard. It is supplied complete with karabiner, enabling a quick and secure attachment.

The G.AutoReel fall arrester keeps the webbing lifeline taught against the user and eliminates the potential for slack webbing, which reduces free fall distance. The quick acting locking mechanism results in lower forces being exerted onto the user's body during a fall, thereby reducing the possibility of injury. The impact absorbing casing gives good protection with high durability and the unit features a shock absorbing element.

The G.AutoReel fall arrester weighs just 1.25kg (complete with karabiner) making it both a safe and lightweight solution for working at height.

Features

- ◆ Weight: 1.25kg (inc. karabiners)
- ◆ Safe alternative to a shock absorbing lanyard
- ◆ Shock absorber
- ◆ Quick-acting locking mechanism
- ◆ Extended length: 2.5m
- ◆ 140kg safe working load.
- ◆ Supplied complete with top karabiner (not pictured)
- ◆ CE certified, fully tested to European standards. Conforms to EN360
